

Find More Ways To Save

It's easy to start saving with these programs from Delmarva Power.

HVAC Upgrade

If your contractor recommends a replacement after your tune-up, consider a high-efficiency system. You can save up to 20% on energy costs each year.

Appliance Recycling

You can recycle your old, working refrigerator or freezer and get \$50—plus pickup and disposal at no cost. Receive an additional \$25 when you recycle a working room air conditioner or dehumidifier at the same time.

Quick Home Energy Check-up

Request a no-cost check-up with a certified Energy Analyst. You may receive energy-saving products like ENERGY STAR® certified LED bulbs and an efficient-flow showerhead at no additional cost.

Energy Wise Rewards™

Let your smart thermostat do the energy-saving work for you, and you can earn up to \$40 in bill credits, per device, each year you participate.

For more information on these and other energy-saving programs, visit delmarva.com/SaveEnergy.

Is Your Home Running Hot and Cold?

Schedule a no-cost HVAC Tune-up.

This program supports the EmPOWER Maryland Energy Efficiency Act.

An Ounce of Prevention...

When it comes to your heating and cooling equipment, everything is great until it isn't. Right?

We get it. Like with your car, a little maintenance goes a long way to head off an untimely breakdown and costly repairs or replacement. That's why Delmarva Power offers you a no-cost HVAC Tune-up.

The Inspection

The goal of our HVAC Tune-up is to get your heating and cooling system restored to its optimal working condition. A specially trained HVAC contractor will come to your home and thoroughly evaluate your system using a number of procedures:

- ✓ **System diagnostic testing**
- ✓ **Coil review**
- ✓ **Indoor and outdoor coil cleaning (if accessible)**
- ✓ **Electrical inspection**
- ✓ **Refrigerant level check**
- ✓ **Condensate drain cleaning (if applicable)**

The net result is a more energy-efficient system that can keep you comfortable and may reduce your costs.

How Does the Tune-up Help?

Save money

Well-maintained equipment can help prevent costly breakdowns, reduce energy use, and extend the life of your system.

Enhance comfort

Regular maintenance helps your system produce and distribute warm or cool air more evenly around your home and helps minimize the chances of a noisy unit.

Improve air quality

A tune-up battles a variety of substances (like dust mites, pollen, and mold you'd rather not breathe), helping enhance indoor air quality.

Help the environment

Consuming considerably less energy is good for the planet.

Upgrade Your Thermostat

We may install a new smart thermostat during your appointment at no additional cost.* Smart thermostats can learn your temperature preferences and help you save on energy costs.

Request your HVAC Tune-up at delmarva.com/Schedule or call **866-353-5799** for more information.

*Not everyone will be eligible to receive a smart thermostat. Work with your contractor to determine your eligibility.
