

“Saving energy starts with a Quick Home Energy Check-up.”

—Zoe, Your Good Energy Guide

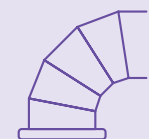

Every change begins with a first move, and this is an easy one. We'll do a quick walk-through of your home, looking for ways to cut costs.

After our walk-through, we'll give you a custom report with follow-up recommendations, which might include:

Adding insulation
to your attic

Sealing and balancing
your ductwork

Replacing your heating
or cooling systems

Upgrading your lighting
or large appliances

During your check-up, you also could receive no-cost energy-saving products, such as:

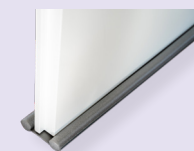

Smart thermostats*

Advanced power strips

LED light bulbs

Door sweeps

Weatherstripping

Efficient-flow showerheads
