

Reduce Your Building's Energy Use

OPERATIONS AND MAINTENANCE TRAINING PROGRAM

Operating your building efficiently can be challenging. Advanced systems require today's professionals to understand how all equipment works together to achieve the most energy savings.

Want to start saving?

Learn how to reduce energy consumption in your building with training courses available in a variety of formats. Delmarva Power provides financial incentives to help cover the cost, **saving you up to \$1,000 per course.***

Why take approved courses?

All courses are nationally recognized and help building operators transform their workplaces into more comfortable, energy-efficient, and environmentally friendly facilities.

Who should participate?

Aimed at building operation professionals, this program caters to building engineers, maintenance staff, and electricians who possess a minimum of two years of experience.

Eligibility

Applicants must meet the following eligibility criteria:

- 1 Work at a commercial or industrial facility within Delmarva Power's service territory for at least 50% of their working hours.
- 2 Be in a position of responsibility for energy management in the facility or have the potential to influence the building's energy performance.

Incentives

Each approved applicant will be eligible to receive a financial incentive that covers up to \$1,000 per course.* The applicant must submit proof of attendance via a certificate of completion or other similar documentation to receive the incentive.

Applicants must apply for and receive pre-approval from Delmarva Power before enrolling in a course. A list of prequalified courses can be found at delmarva.com/OMT. In addition, applicants and employers can propose other relevant courses for Delmarva Power's consideration.
