

CEE Qualifying Residential Tier 2 Clothes Washers

February 15, 2019

[This list is based on the 2018 CEE Residential Clothes Washer Specifications.](#)

The list is updated monthly. See the CEE website (www.cee1.org) for the most recent listing.

Brand	Model Number	Integrated Modified Energy	Integrated Water Factor (IWF)	Volume (cu. ft.)	Uses Silver Ion Technology?	Front or Top Loading?	ENERGY STAR® qualified?	Meets ENERGY STAR Connected	Meets CEE Connected Criteria
Amana	NFW5800H**	2.92	3.2	4.3	No	Front	Yes	No	No
Crosley	CFWH4084G**	2.92	3.2	4.2	No	Front	Yes	No	No

Key

• Symbols: An asterisk (*), plus sign (+), or pound sign (#) indicate that one or more coding variables may be used in place of the symbol to indicate a color or feature that does not affect washer efficiency.

• *Red italics* indicate that a product has been discontinued. Discontinued models are no longer manufactured, but may still be available in the marketplace.

• *Blue italics* indicate a US-only model.

• **Bold text** indicates a combination washer-dryer model. These models are defined as a product designed to clean and dry fabrics in a single drum, where a separate dryer cycles uses electricity or gas as a heat source and forced air circulation.

• IMEF=The quotient of the cubic foot (or liter) capacity of the clothes container divided by the total clothes washer energy consumption per cycle, with such energy consumption expressed as the sum of the machine electrical energy consumption, the hot water energy consumption, the energy required for removal of the remaining moisture in the wash load, and the combined low-power mode energy consumption. A higher number indicates a more efficient use of energy.

• IWF= Integrated Water Factor (The quotient of the total weighted per-cycle water consumption for all wash cycles in gallons divided by the cubic foot (or liter) capacity of the clothes washer. A lower number indicates a more efficient use of water.

• Uses Silver Ion Technology? = A "Yes" in this column indicates that this model uses Silver Ion Technology, which may impact its eligibility for some rebates.

• Although all models on the CEE list are very efficient, the tiers are structured so the most efficient products are listed in the higher tiers. For example, Tier 2 would contain the most efficient models.
