# WE'LL HELP YOU SAVE \$700 ON A HYBRID WATER HEATER

## Use the Attached Mail-in Rebate Form to Save

Compared to a standard electric water heater, an ENERGY STAR certified hybrid water heater (also known as an electric heat pump water heater) can help you save about \$350 per year on energy costs for a typical household.

Although an ENERGY STAR model may cost more upfront, the energy savings add up quickly. In about two years or less, you'll save enough in reduced energy use to cover the cost of the difference. And, you'll continue to save over the life of the appliance.\*

Not all water heaters qualify for a rebate. Visit [delmarva.com/HWH](http://delmarva.com/HWH) to determine which models qualify.

## Installation Considerations

Hybrid water heaters have unique requirements in terms of placement and available space compared to a conventional electric resistance unit. Visit [energystar.gov](http://energystar.gov) for a list of considerations to take into account before making your purchase.

To learn more, call **1-866-353-5799** or visit [delmarva.com/HWH](http://delmarva.com/HWH).
